 <h2>Intro to Academy</h2>	<p>Intro to Academy 8 Sections <span>Fundamental</span> <span>General</span></p> <p>Your first stop in Hack The Box Academy to become acquainted with the platform, its features, and its learning process.</p>	<p>100% Completed</p> <div style="width: 100%; background-color: #2e7131; height: 10px;"></div>
 <h2>Learning Process</h2>	<p>Learning Process 20 Sections <span>Fundamental</span> <span>General</span></p> <p>The learning process is one of the essential and most important components that is often overlooked. This module does not teach you techniques to learn but describes the process of learning adapted to the field of information security. You will learn to understand how and when we learn best and increase and improve your learning efficiency greatly.</p>	<p>100% Completed</p> <div style="width: 100%; background-color: #2e7131; height: 10px;"></div>
 <h2>Linux Fundamentals</h2>	<p>Linux Fundamentals 30 Sections <span>Fundamental</span> <span>General</span></p> <p>This module covers the fundamentals required to work comfortably with the Linux operating system and shell.</p>	<p>76.67% Completed</p> <div style="width: 76.67%; background-color: #2e7131; height: 10px;"></div>
 <h2>Introduction to Networking</h2>	<p>Introduction to Networking 21 Sections <span>Fundamental</span> <span>General</span></p> <p>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</p>	<p>14.29% Completed</p> <div style="width: 14.29%; background-color: #2e7131; height: 10px;"></div>
 <h2>Getting Started</h2>	<p>Getting Started 23 Sections <span>Fundamental</span> <span>Offensive</span></p> <p>This module covers the fundamentals of penetration testing and an introduction to Hack The Box.</p>	<p>21.74% Completed</p> <div style="width: 21.74%; background-color: #2e7131; height: 10px;"></div>
 <h2>Penetration Testing Process</h2>	<p>Penetration Testing Process 15 Sections <span>Fundamental</span> <span>General</span></p> <p>This module teaches the penetration testing process broken down into each stage and discussed in detail. We will cover many aspects of the role of a penetration tester during a penetration test, explained and illustrated with detailed examples. The module also covers pre-engagement steps like the criteria for establishing a contract with a client for a penetration testing engagement.</p>	<p>100% Completed</p> <div style="width: 100%; background-color: #2e7131; height: 10px;"></div>

## Introduction to Information Security

24 Sections Fundamental General

### Introduction to Information Security

This theoretical module provides a comprehensive introduction to the foundational components of information security, focusing on the structure and operation of effective InfoSec frameworks. It explores the theoretical roles of security applications across networks, software, mobile devices, cloud environments, and operational systems, emphasizing their importance in protecting organizational assets. Students will gain an understanding of common threats, including malware and advanced persistent threats (APTs), alongside strategies for mitigating these risks. The module also introduces the roles and responsibilities of security teams and InfoSec professionals, equipping students with the confidence to advance their knowledge and explore specialized areas within the field.
